A Hunter's Armor.

An Essex, Conn., sportsman is having manufactured for him a complete suit of rubber clothing, by means of which he expects to slaughter numberless black ducks. The head piece is the only part to be left in view, and is made in the form of a wild duck sitting on the water with magnifying glass eyes. The occupant can slaughter game by the wholesale when the ducks come near the decoy object to see what it is. It is quite an original invention and it is expected to work to perfection, the only drawback being that some other sportsman may take the head piece for a real duck and blose away before discovering his

GULF AND UNION PACIFIC. Arranging for the Operation of the Joint Yards at Deaver.

OMAHA, April S.—Receiver Frank Trumbull, of the Gulf road, and General Manager Dickinson of the Union Pacific completed their conference at moon regarding the details of the management of the joint yards at Denver and the operation of the Julesburg branch. As to the latter, the Gulf road will take the Union Pacific trains at Julesburg and work them to Denver on a mileage basis, and was suggested in the trial of the Gulf case before Judges Caldwell and Sanborn last

The Gulf system will be held respon-sible for the trains after leaving Jules-burg and on their return from Denver. The crews and engines from Julesburg to Denver and return will be in the em ploy of the Gulf system and their joint operation will be paid for as above stated.

Switching in the Denver yards and other detail features have all been amicably adjusted and a joint contract has been agreed upon less onerous to the Union Pacific than if the old contract had been held good by the circuit court in equity in the case.

Mr. Trumbull left for St. Louis at noon. SOLDIERS' HOMESTEADS.

Won't Have to Live on the Land Six Months If This Bill Passes.

Washington, April 3 .- The senate committee on public lands has agreed to report favorably Senator Kyle's amendment to the sundry civil appropriation bill providing that any honorably discharged soldier of the late civil war, and not now the owner of 160 acres of land, and who has not availed himself of privileges under the land laws of the United States, may acquire title to 160 acres of land by making application therefor in person at any government land office and paying the minimum price of \$1.25 per acre. This law now requires a residence of six months on the part of the

# BLOODY INDIAN FIGHT.

Cowboys and Settlers Near El Reno, O. T., Have a Desperate Encounter.

EL RENO, O. T., April 3 .- Advices from the scene of an encounter between a band of depredating Indians and some cowboys who were herding cattle, were brought here today by a courier who came for military assistance. He reported that when he left, the fight was yet in progress and that then some eight or ten of the Indians and half that many white men had been killed or wounded. The settlers were rushing to the aid of

the fighting cowboys and had surrounded the band of Indians and were slowly and surely picking them out. Two troops of cavalry left the fort for the scene of action, but as the distance is about seven miles they will not likely arrive before the battle is over. Most of the settlers are well armed and accustomed to fighting Indians and will take the opportunity to settle old scores.

The feeling toward the Indians among the people who know them is very bitter, and the chances are good that many will be killed before the troops get to There has been no news of the battle since the first courier came in and later

news is eagerly awaited. No evidence

of excitement or trouble is seen among the Indians of this neighborhood, and it is not feared that they will participate in the trouble. TOM JOHNSON'S FRANK.

Not Good to Carry Single Tax Pamphlets OTTAWA, Ont., April 3. — Some time ago, Congressman Tom L. Johnson sent a number of single tax pamphlets to members of the Toronto single tax club. Instead of American stamps, the parcels bore Johnson's frank and were consequently seized by post office authorities

and destroyed.

In the house of commons Gilmer (Liberal) asked the government for particulars. Sir Adolph Caron, postmaster general, said that in courtesy legislative papers of the United States congress were given delivery without stamp. Mr. were given delivery without stamp. Mr. Johnson's pamphlets did not answer this description. Mr. Gilmer will bring the matter up again.

THE TARIFF BILL.

Senator Allison Speaks in Opposition to the Bill. Washington, April 3 .- The tariff bill

came up in the senate after some bus-iness of minor importance had been transacted. Mr. Allison spoke in opposition to the bill Mr. Vest submitted amendments most of which are to correct oversights by the finance committee. Mr. Allen, of Nebraska, offered a free coinage bill as an amendment to the tariff bill.

Costa Rica Elects a President. NEW YORK, April 3 .- C. A. Delgado, consul of Costa Rica in this city, received a cable message from San Jose, the capital of that republic, today saying that Don Raphael Yglesias, the liberal can-didate, has been elected to the presidency in succession to Don Jose Roderoguez Perfect order prevailed throughout the republic. The new pres-ident will take the reins of the govern-

The Rival Assessors. The case of the rival city assessors, Geo. D. Hale against Oscar Bischoff, was tried and argued in the supreme court this morning. Col. T. W. Harrison and S. B. Bradford appeared for Mr. Hale, and David Overmyer and S. B. Isenhart argued the case for Mr. Bischoff. Both sides filed written briefs in the case which will be decided by the court in

ment on May 8.

about ten days. Prof. W. H. Lieb and Mrs. Charles S. Gleed will give a recital for the benefit of Ingleside on Friday evening, April 6th, at Library hall. The artists being great favorites with the musical public will no doubt insure them a full house.

The board of managers of the Kindergarten association will meet on tomorrow (Wednesday) afternoon, at 3:30 o'clock, at the home of Mrs. T. E. Bow-

AMONG THE HORSES.

Portraits of a Beautiful Hackney and a Graceful Orloff.

A day spent among the horses is recorded with a shining mark in the memory of a lover of these grand animals, especially if he is chained to a desk in an office most of his waking hours. Such a white day the writer hereof passed lately at the Indian Neck stud, Oakdale, L. I. The owner of the farm, Mr. Frederick G. Bourne, president of the Singer Machine company, is one of those wealthy Americans who for the love of it more than for gain has engaged in the work of improving the breeds of horses in this country. Such men do not come in competition with the ordinary farmer—on the contrary, they aid him.

Mr. Bourne's favorite in horseflesh is the hackney, which is the favorite also of Mr. Alexander Mair, superintendent of the Bourhe stables. At present the pride of Mr. Mair's eyes is Enthorpe Performer, 4 years old, registered in the

HACKNEY STALLION ENTHORPE PERFORMER Enthorpe is considered one of the most perfect hackney stallions ever seen in America. At Indian Neck farm he is considered the best specimen. He is of the Yorkshire breed and is a bright bay, with "four white feet and snip on the nose." Enthorpe is a colt by the fa-mous Matchless of Londesboro and resembles his sire, showing the approved short back and strong neck of the hackney. In the Danegelt breed, from which Enthorpe Performer and Matchless are descended, the four white stockings, star in the forehead and snip on the nose are always looked for, they being characteristic of the Danegelts. Enthorpe is a cross of Danegelt-Fireaway blood. His dam is Peg, by Superior. His high step-ping is a sight to behold.

Enthorpe is 15 1¼ hands in height. Horsemen especially delight in his "action," which to the uninitiated appears to be the making of a great fuss and to do over every step he takes without getting over the ground any faster for it. However, that is the quality now demanded in fashionable carriage horses, and Enthorpe has it in perfection. His hind action is magnificent, he handling his hocks admirably. It may interest our readers to know that Enthrope is valued at \$25,000. At Indian Neck it is found that hackneys quite equal to the

ORLOFF STALLION AD. The second illustration shows a far different though none the less beautiful

animal—the Russian Orloff high school (haute ecole) saddle stallion Ad. Like all the Orloffs, Ad is a tall horse, being 15.3. He is 8 years old. Ad is a fine model of the saddle animal. He is trained in all the tricks of the riding school or high school horse, so called. He can walk Spanish, go through all the fashionable steps and movements riders of fancy saddle stock demand and almost dance a jig. He could do that undoubtedly if it was considered the fashionable thing. Our artist has caught Ad's pose just as he is in the act of stepping out for his Spanish walk. The long, full, flowing tail, which has never been mutilated by the fashionable system of docking, adds not a little to his stately and graceful appearance. He is an imported horse, a beautiful bay, with black mane and tail, and so gentle that he was ridden last summer by a little girl.

A Foot of Air to the Pound of Live Weight. The true principle of ventilation is to let fresh air into the building by small apertures in many places and to take it out by the same principle. Probably no better simple plan could be devised than to build a box about a foot square and as long as the building, 102 feet, with an end extending out of each end of the building. This box should be pierced with numerous small holes and placed overhead in the rear of the cattle and between the two rows. This will carry out the vitiated air which rises to the ceiling. In front of the cattle at the floor on each side of the building about six openings of 1 by 2 feet and connecting with the outside air should be made. This should be covered with wire netting, say, of one-quarter to one-half inch mesh or with boards pierced with nu-

In front of each one of these cold air ventilators should be placed a slide, so that they may be partly or entirely closed as occasion requires. It will be seen that by this method the pure air will mingle with the heavy carbonic acid gas, and as all is warmed by the animals it will rise to the ventilator at the ceiling and escape. In addition to this numerous windows should be placed in the building for light and air. Some days the windows should all be thrown open, as it is impossible to properly ventilate a building with so many animals in it on warm muggy days without these win-dows.—Cor. Bural New Yorker.

THE SEATS PICKED OUT.

Contract Let Today For Supplying the High School. The board of education hold a meeting today for the purpose of opening bids and determining on the contractor for supplying the new high school build-ing with seats. There were eleven bidders, and the successful company was the United States School Furniture Co. of Grand Rapids, Michigan, which was represented by Josiah Jordon, and its general western agent, D. E. Hunt. There were also five bidders for the purpose of supplying the gallery of the as-

sembly rooms with opera chairs, but action on this line was deferred. The seats which have been adopted are an automatic, single seat arrangement, of a new pattern. The contract

amounts to about \$1,000. The board went into "secret session" for the purpose of letting this contract.

The board met last night in regular monthly session. The request of Bowers & Martineau, the high school contractors, for a continuance of their time to complete the high school, by reason of delay in the plumbing, was referred to

the building committee. W. M. Davidson was re-elected superintendent of the city schools for another year, and H. W. Farnsworth was reelected clerk of the board. The time for the next high school commencement was set for May 29th. Superintendent Davidson reported that more than 100 city teachers have signified their intention to attend the meeting of the teachers at

Lawrence on Friday.
